

Non-CBCS

The programme will provide a well-structured curricula for the graduate students which will prepare them for employment and higher studies. It will give real life knowledge of economics to the students. Students will be able to develop their understanding of core economic terms, concepts and theories. They will be encouraged to understand the basic economic principles and will also learn about their applications to a wide range of real-world issues. Students will learn how economic activities like production, consumption, distribution etc. are organized by the markets. The course will also provide knowledge about national income, employment, inflation, deflation, business cycle, monetary and fiscal policy, banking system etc. Students will acquire analytical and reasoning skill and will be able to predict about possible economic outcomes based on economic theories. Students will be equipped with quantitative analytical skills with the help of which they will be able to collect, tabulate, present and analyse data to support economic decision making which will help them entering into the world of research. The teaching of various courses in Economics will help the students to acquire an in-depth knowledge about the Indian and global economies.

PROGRAMME SPECIFIC OUTCOME (CBCS):

As the undergraduate CBCS programme is at par in all over the country, students will be immensely benefitted to gather knowledge about the subject equally with the students of other parts of India. This will help them to be prepared for National competitive examinations and students will be able to get equal job opportunities along with job seekers around the nation. The programme is such that students can choose any of the subject of their choice, may it be from any stream which is of utmost importance to unlock the potential of students for they will find interest in the subject of their choice that will help them to build the future career. CBCS programme will definitely be beneficial for the ongoing education system to build a strong and self-sufficient future citizen of India if the programme is properly implemented all over the country with sufficient teaching force and improved infrastructure with advanced technology.
